NCECO-D

October 26, 1984

SUBJECT: BASF Wyandotte Riverview Site Modification Program.

MR. Bill Axce
BASF Wyandotte Corporation
Wyandotte, Michigan 48192

Dear Mr. Axce,

The fourth paragraph of my October 10, 1984 letter contained the following statement: "Mr. Roy Jameson observed that soil moisture and density determinations were at, or above acceptable levels for material placed prior to October 1, 1984, which had been previously classified and tested for permeability."

That statement should have read: "Mr. Roy Jameson observed that soil moisture levels were within acceptable limits and corresponding density determinations were at or above acceptable levels for material placed...."

I trust that the above clarifies the intent of my October 10, 1984 letter.

Contact Mr. Carl Woodruff at 226-3074 if you require further information.

Sincerely,

Ronald I. Bobbitt
Chief, Detroit Area Office
